CMPE2550 – ICA08 [ASP] – SQL Server and Data Retrieval

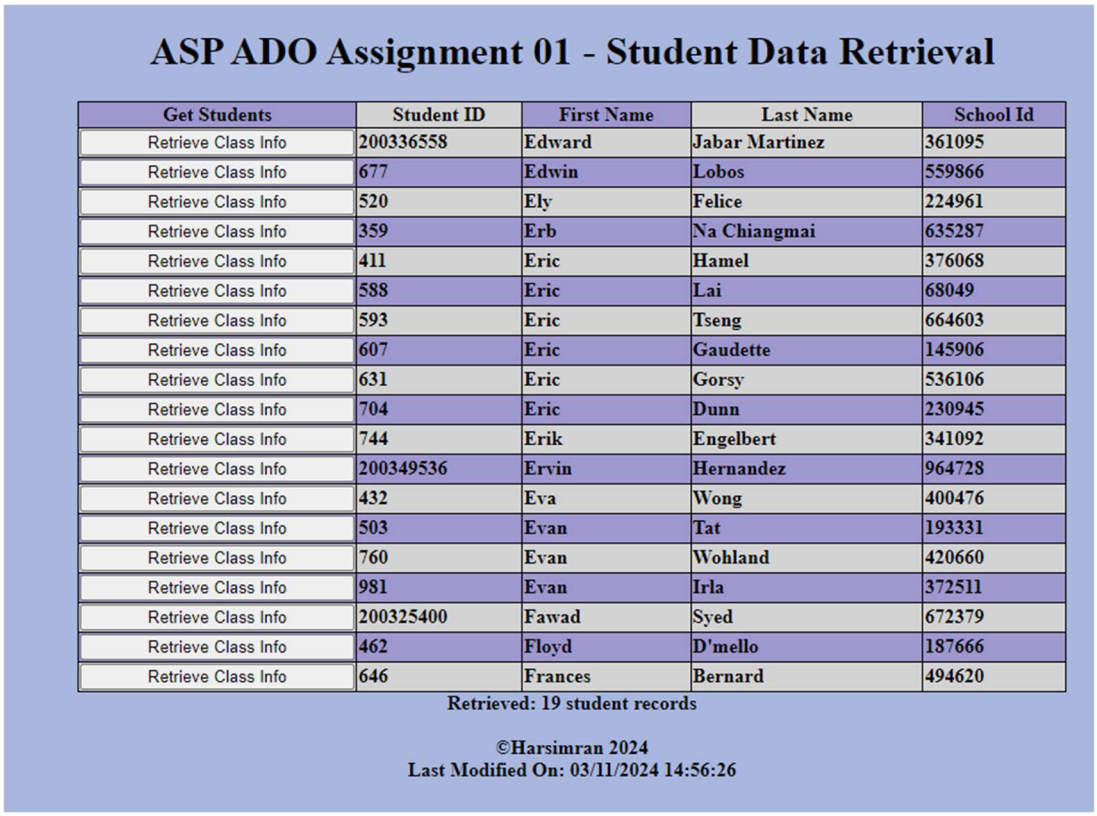
In this exercise, you will incorporate ASP Core functionality, connection to database. You will begin your familiarity with the Microsoft SQL Server management Studio, use ASP Core and ADO to execute retrieval queries against a SQL Server database.

ClassTrak Database

You will have been shown in class how to link your databases to ASP Core files using ADO.

Data Retrieval and Display

You shall construct the page necessary to display students' information for students whose first name starts **with E or F**. See the image below for an example layout of the student's information (you do not need to match this exactly). When the user browses to the page, the student's data shall be immediately retrieved and displayed.



ASP ADO Assignment 01 - Student Data Retrieval

Get Students	Student ID	First Name	Last Name	School Id
Retrieve Class Info	200336558	Edward	Jabar Martinez	361095
Retrieve Class Info	677	Edwin	Lobos	559866
Retrieve Class Info	520	Ely	Felice	224961
Retrieve Class Info	359	Erb	Na Chiangmai	635287
Retrieve Class Info	411	Eric	Hamel	376068
Retrieve Class Info	588	Eric	Lai	68049
Retrieve Class Info	593	Eric	Tseng	664603
Retrieve Class Info	607	Eric	Gaudette	145906
Retrieve Class Info	631	Eric	Gorsy	536106
Retrieve Class Info	704	Eric	Dunn	230945
Retrieve Class Info	744	Erik	Engelbert	341092
Retrieve Class Info	200349536	Ervin	Hernandez	964728
Retrieve Class Info	432	Eva	Wong	400476
Retrieve Class Info	503	Evan	Tat	193331
Retrieve Class Info	760	Evan	Wohland	420660
Retrieve Class Info	981	Evan	Irla	372511
Retrieve Class Info	200325400	Fawad	Syed	672379
Retrieve Class Info	462	Floyd	D'mello	187666
Retrieve Class Info	646	Frances	Bernard	494620

Retrieved: 19 student records

The buttons in the "`Retrieve Class Info`" column shall be configured such that if one of the buttons is pressed, the classes for the student along with Instructor information will be displayed in a subsequent div. See the image below for a sample layout (again this need not match exactly). The

classes records shown are for a specific student. Note that not all students will have classes for that student. You should avoid displaying an empty table when this occurs, and instead just show a status message indicating no records were found.

Note: This will be a living document as it is the first time it is being delivered. If typos are encountered, or an explanation is not clear or seems incomplete, please approach your instructor about it so that the feedback may be passed to the document creator. If the fix is complex enough, this document will be added to or changed, and the class alerted. Do keep in mind that you are expected to do some of the thinking and specific design, so this document has not been designed as a step-by-step recipe for completing the assignment, but more intended as a discussion of the requirements.
